What is Post-Acute Care?

As you prepare for discharge from the hospital, choosing the optimal rehabilitation to achieve your goals is of vital importance. The Hills understands that the quickest pathway to recovery depends upon attaining your prior level of function. We begin with a thorough assessment of your needs, concerns, and desires; then our family of healthcare professionals will develop a personal and appropriate care-plan tailored just for you.

Working hand in hand with our experienced nursing team, our therapists – disciplines in physical, occupational, speech, and respiratory therapy – will design a vigorous rehabilitation regime to accomplish your goals. Our passion lies in returning you quickly, safely, and successfully to your prior living arrangements.
